

## The Korth Model for the novice as well as the shooter

Effective immediately, we are offering the hunter and the sport shooter a modified revolver model, from our traditional production series, with a very attractive retail price of \$3995.

This special revolver („Troja Modell“) is offered in caliber .357 Magnum as a Combat model with a 4" barrel, as well as a Sport model with a 6" barrel. The technical preference and the material selection is analogous to our higher priced revolvers. No compromise is made and all mechanical specifications remain unchanged. Only the exterior finish and the grips are rescinded.

Both the modified 4" Combat and the 6" Sport have a satin finish and walnut grips which completely envelope the frame. By means of this unique finger contoured grip, one has optimal control of the weapon.
